

P&J WINDPOWER – USING THE WIND FOR A SUSTAINABLE TOMORROW

Company Overview

P&J Windpower ApS is a leading global supplier of used wind turbines, specializing in the sale, purchase, and dismantling of turbines and spare parts. With offices in **Denmark** and **Germany**, we serve clients around the world, providing high-performance wind turbines at competitive prices.

With over **25 years of experience** in the wind energy industry, we have traded and dismantled more than **1000 turbines** since our founding in **1999**. Our vast knowledge and established international network enable us to offer cost-effective solutions to customers seeking to repower their wind farms or purchase high-quality used wind turbines.

Our Services

- **Used Wind Turbine Sales**

We offer a wide range of approved, high-efficiency turbines from renowned manufacturers, including **Vestas, Micon, Nordex, Enercon, Bonus, Nordtank, Tacke, Repower** and others. We ensure that each turbine is thoroughly inspected and meets industry standards for performance and reliability.

- **Turbine Dismantling & Transport**

Our experienced team manages the entire process from **dismantling to transportation**. We handle everything — from safely disassembling turbines to organizing their transportation to the agreed delivery location. Our professional personnel ensures that each project is executed efficiently and safely.

- **Repowering Projects & Consulting**

As a trusted partner in **repowering projects**, we offer expert advice, technical support, and **cost-efficient dismantling** for clients looking to sell their old turbines or upgrade their wind farms. Our consulting services are tailored to ensure optimal solutions for each unique project.

- **Re-erection & Implementation**

We provide full support for the **re-erection and implementation** of your used wind turbines, including technical assistance, site preparation, and integration into existing infrastructure.

- **Spare Parts Supply**

In addition to turbines, we offer a wide range of **spare parts** for many types of wind turbines, ensuring the continued efficiency of your assets.

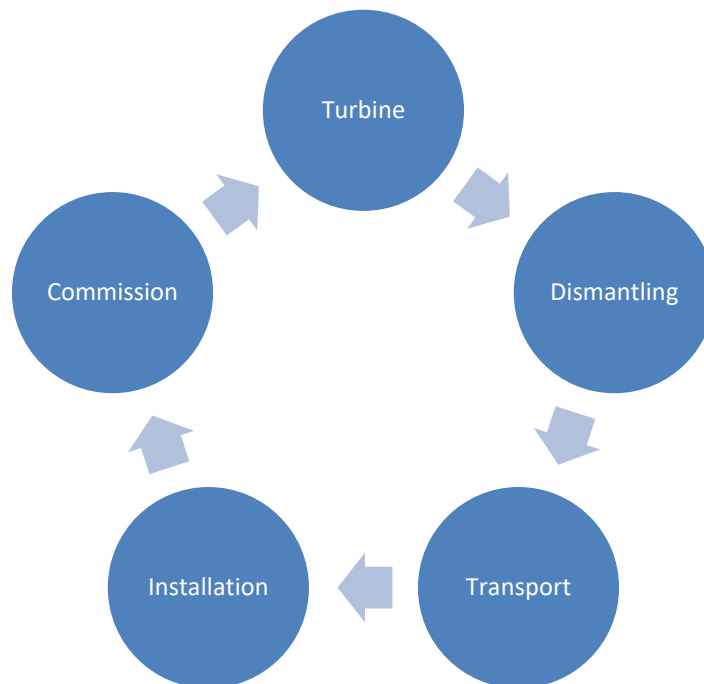

Why Choose P&J Windpower ApS?

- **Extensive Experience:** Over **25 years** in the wind energy industry with a proven track record.
- **Global Reach:** Offices in **Denmark** and **Germany**, serving clients around the world.
- **Competitive Pricing:** Thanks to our international network, we offer **competitive prices** for used turbines and wind farms.
- **Tailored Solutions:** Each client receives a personalized offer based on their needs, including turbine brand, capacity, age, and condition.
- **Comprehensive Services:** From purchasing and dismantling to transport, erection, and expert advice, we cover all aspects of used wind turbine projects.

Your Trusted Partner in Wind Energy

At **P&J Windpower ApS**, we pride ourselves on being a **professional, reliable partner** for used wind turbine projects. Whether you're looking to buy, sell, dismantle, or repower your wind farm, we provide expert guidance every step of the way.

There are **no standard prices** for used turbines, as each project is unique. Let us know what you need, and we'll work with you to provide a **customized solution** that fits your requirements.

Company Know-how

Managing Director Michael Kristensen

Michael Kristensen brings over 20 years of experience in the renewable energy sector, with a strong foundation as an electrical engineer. Throughout his career, he has built up broad technical expertise, particularly in the operation and decommissioning of wind turbines.

His hands-on approach and deep understanding of turbine systems have made him a trusted specialist in the field. In addition to his consulting and technical roles, Michael also operates several wind turbines himself, combining practical experience with long-term industry insight.
